

Viewing Instructions for video of memorial service for Betty Roberts

Click on the purple “Launch Playback” button at the right of the screen.

The circle/triangle symbol in the center of the screen may appear to stop, but it will be working. It will take several seconds to start displaying, and then at first may be jerky and funny sounding if you don't have a very fast connection.

Tips/Options:

- To go to “full screen” (bigger picture), press the “F” key.
To return to a smaller screen view, press the “Esc” key (upper left corner of your keyboard)

(With Internet Explorer, you may have to push the F11 key to get to “full screen”, and then F11 to return to the regular screen.)
- To expand the video screen to an even large size, double-clicking on the window. Double-clicking again will return it to the previous size.
- To pause the video, press the Space Bar. To start the video again after pausing, press the Space Bar again.
- To scroll forward or back quickly to other parts of the video, click on “Scenes” (at right).

If you don't see the box on the right with the Scenes choice, click on the APPS at the bottom of the screen to display the choices. (Clicking APPS again will turn off the display of choices.)

To turn off the Scenes display, click on the word Applications above the scenes.
- You may drag the video screen to a different position on the screen.
